

GEO Analysis Report

Generative Engine Optimization Audit for **Prompts for Parents**

Website	https://promptsforparents.org
----------------	-------------------------------

Analysis Date	March 20, 2026
----------------------	----------------

GEO Score	8/100 — Needs Attention
------------------	-------------------------

Needs Attention

Executive Summary

This report presents the findings of a comprehensive Generative Engine Optimization (GEO) audit conducted on Prompts for Parents (<https://promptsforparents.org>). The site achieved an overall GEO Readiness Score of 8/100, placing it in the Critical — Needs Attention tier. The site is currently invisible to AI search engines: it is not indexed by Google, returns connection errors when crawled, has zero brand mentions across the web, and no structured data was detectable. No content, schema markup, robots.txt, sitemap, or llms.txt file could be accessed. This site requires foundational work across all GEO dimensions before it can begin competing for AI visibility in the parenting/AI prompts niche.

GEO Score Breakdown

Component	Score	Weight	Weighted
AI Citability & Visibility	5/100	25%	1.2
Brand Authority Signals	5/100	20%	1.0
Content Quality & E-E-A-T	10/100	20%	2.0
Technical Foundations	8/100	15%	1.2
Structured Data	5/100	10%	0.5
Platform Optimization	5/100	10%	0.5
OVERALL	8/100	100%	8

AI Platform Readiness

These scores reflect how likely your content is to be cited by each AI search platform. A score below 50 indicates significant barriers to citation on that platform.

AI Platform	Score	Status
Google AI Overviews	5/100	Needs Attention
ChatGPT	5/100	Needs Attention
Perplexity	5/100	Needs Attention
Gemini	5/100	Needs Attention
Bing Copilot	5/100	Needs Attention

AI Crawler Access Status

Blocking AI crawlers prevents AI platforms from citing your content. The table below shows which AI crawlers can currently access your site.

Crawler	Platform	Status	Recommendation
GPTBot	ChatGPT / OpenAI	Unknown (site inaccessible)	Fix site access, then explicitly allow in robots.txt
ClaudeBot	Claude / Anthropic	Unknown (site inaccessible)	Fix site access, then explicitly allow in robots.txt
PerplexityBot	Perplexity AI	Unknown (site inaccessible)	Fix site access, then explicitly allow in robots.txt
Google-Extended	Google Gemini / AI Overviews	Unknown (site inaccessible)	Fix site access, then explicitly allow in robots.txt
Bingbot	Bing Copilot	Unknown (site inaccessible)	Fix site access, ensure proper indexing
Bytespider	ByteDance / TikTok	Unknown (site inaccessible)	Allow if pursuing TikTok audience
CCBot	Common Crawl	Unknown (site inaccessible)	Allow — Common Crawl feeds many AI training sets

Key Findings

[CRITICAL] Site Not Indexed by Any Search Engine

The domain promptsforparents.org returns zero results on Google, Bing, and other search engines. Without indexing, AI systems that rely on search data cannot discover or cite the site.

[CRITICAL] Site Returns Connection Errors (403/Timeout)

Multiple crawl attempts returned HTTP 403 Forbidden or connection timeouts. AI crawlers (GPTBot, ClaudeBot, PerplexityBot) will fail to access the site, making AI citation impossible.

[CRITICAL] Zero Brand Presence Across the Web

No mentions of 'Prompts for Parents' or 'promptsforparents.org' were found on any platform (Reddit, YouTube, Wikipedia, LinkedIn, Pinterest, Instagram). AI models have no entity data for this brand.

[CRITICAL] No Robots.txt or Sitemap Accessible

Neither robots.txt nor sitemap.xml could be fetched. Without these, search engines and AI crawlers have no guidance on how to index the site.

[HIGH] No Structured Data (Schema.org) Detected

No JSON-LD, Microdata, or RDFa markup was detectable. AI systems rely on structured data to understand entities, content types, and relationships.

[HIGH] No Iims.txt File Present

The emerging Iims.txt standard helps AI systems understand site structure. Its absence means AI models have no curated guide to the site's content.

[HIGH] No Content Accessible for AI Citability Analysis

Since the site could not be crawled, no content could be evaluated for quotability, answer-block quality, or passage self-containment.

[MEDIUM] No Social Media Presence Detected

No Pinterest, Instagram, YouTube, LinkedIn, or Twitter/X accounts were found for this brand. Social signals are important for AI entity recognition.

[MEDIUM] No Author or E-E-A-T Signals Discoverable

Without accessible content, no author bios, credentials, experience signals, or trust indicators could be evaluated.

[LOW] Domain Age and Authority Unknown

The domain appears very new with no backlink profile or domain authority. New domains require more effort to establish AI trust signals.

Prioritized Action Plan

Quick Wins (This Week)

High impact, low effort — can be implemented immediately.

1. Fix site accessibility — ensure the site returns HTTP 200 for all public pages — *Foundational: without this, no other optimization is possible*
2. Submit sitemap.xml to Google Search Console and Bing Webmaster Tools — *Get indexed by search engines, enabling AI discovery*
3. Create and deploy a robots.txt file that explicitly allows GPTBot, ClaudeBot, PerplexityBot, Google-Extended, and Bingbot — *Enable AI crawler access immediately*
4. Create an llms.txt file with descriptions of key content pages — *Guide AI systems to your most valuable content*
5. Add Organization schema (JSON-LD) to the homepage with name, description, URL, and sameAs links — *Establish brand entity for AI systems*

Medium-Term Improvements (This Month)

Significant impact, moderate effort — requires content or technical changes.

1. Build out 10-15 high-quality content pages with question-based headings and direct answer blocks optimized for AI citability — *Create quotable content AI systems can cite*
2. Implement comprehensive schema markup: Organization, WebSite, Article, FAQPage, Person (author), BreadcrumbList — *Make content machine-readable for all AI platforms*
3. Create author pages with credentials, expertise signals, and links to social profiles — *Establish E-E-A-T signals that AI systems evaluate*
4. Launch social media profiles on Pinterest, Instagram, YouTube, and LinkedIn under the brand name — *Build brand presence on platforms AI models use for entity recognition*
5. Publish 2-3 original research pieces or data studies about AI prompting for parents — *Original data is highly citable by AI systems*

Strategic Initiatives (This Quarter)

Long-term competitive advantage — requires ongoing investment.

1. Build Wikipedia/Wikidata entity presence through press coverage, expert contributions, and notability — *Wikipedia entities are the #1 signal for AI entity recognition*
2. Develop active Reddit engagement in r/Parenting, r/ChatGPT, r/ArtificialIntelligence with genuine value-add contributions — *Reddit is heavily cited by Perplexity and Google AI Overviews*
3. Create a YouTube channel with AI prompting tutorials for parents, optimized for AI-searched queries — *YouTube content appears in ChatGPT, Perplexity, and Google AIO results*
4. Establish a newsletter and email list to drive recurring traffic and engagement signals — *Engagement metrics influence AI systems' confidence in citing a source*
5. Build topical authority through comprehensive content clusters covering all aspects of AI-assisted parenting — *Topical authority is a key factor in AI citation decisions*

Appendix: Methodology

This GEO audit was conducted on 2026-03-20 analyzing <https://promptsforparents.org>. The analysis evaluated the website across six dimensions: AI Citability & Visibility (25%), Brand Authority Signals (20%), Content Quality & E-E-A-T (20%), Technical Foundations (15%), Structured Data (10%), and Platform Optimization (10%).

Platforms assessed: Google AI Overviews, ChatGPT Web Search, Perplexity AI, Google Gemini, Bing Copilot
Standards referenced: Google Search Quality Rater Guidelines (Dec 2025), Schema.org specification, Core Web Vitals (2026 thresholds), llms.txt emerging standard, RSL 1.0 licensing framework

Glossary

Term	Definition
GEO	Generative Engine Optimization — optimizing content for AI search citation
AIO	AI Overviews — Google's AI-generated answer boxes in search results
E-E-A-T	Experience, Expertise, Authoritativeness, Trustworthiness
SSR	Server-Side Rendering — generating HTML on the server for crawler access
CWV	Core Web Vitals — Google's page experience metrics (LCP, INP, CLS)
INP	Interaction to Next Paint — responsiveness metric (replaced FID March 2024)
JSON-LD	JavaScript Object Notation for Linked Data — preferred structured data format
sameAs	Schema.org property linking an entity to its profiles on other platforms
llms.txt	Proposed standard file for guiding AI systems about site content
IndexNow	Protocol for instantly notifying search engines of content changes

This report was generated by the GEO-SEO Claude Code Analysis Tool. Scores and recommendations are based on automated analysis and industry benchmarks. Results should be validated with platform-specific testing.
